Ergonomics at the workplace

3D-Design

1. 2. 3. 4.

Ergonomics at the workplace

Investing in an ergonomically designed workplace will benefit both your employees' health and the efficiency and quality of the work they do. On average, employees are absent from work due to illness on around 12 days every year. If this downtime could be reduced by just 3 days with a sensibly designed workplace where ergonomics are concerned, that would equate to annual cost savings of about €1,000 with each employee. The consequent increase in productivity can very quickly accumulate up to an additional €800-1000 per person and year. Your investment in an ideal packing table can therefore pay for itself in just 1 to 2 years.

Solutions for a healthy workday

Industrial safety regulations prescribe basic safety measures to be observed when using work equipment. We will help you to put these regulations into practice.

§ 6 Grundlegende Schutzmaßnahmen bei der Verwendung von Arbeitsmitteln

(1) Der Arbeitgeber hat dafür zu sorgen, dass die Arbeitsmittel sicher verwendet und dabei die Grundsätze der Ergonomie beachtet werden. Dabei ist Anhang 1 zu beachten. Die Verwendung der Arbeitsmittel ist so zu gestalten und zu organisieren, dass Belastungen und Fehlbeanspruchungen, die die Gesundheit und die Sicherheit der Beschäftigten gefährden können, vermieden oder, wenn dies nicht möglich ist, auf ein Mindestmaß reduziert werden. [...]

1. die Arbeitsmittel einschließlich ihrer Schnittstelle zum Menschen müssen an die körperlichen Eigenschaften und die Kompetenz der Beschäftigten angepasst sein sowie biomechanische Belastungen vermeiden. Zu berücksichtigen sind hierbei die Arbeitsumgebung, die Lage der Zugriffstellen und des Schwerpunktes des Arbeitsmittels, die erforderliche Körperhaltung, die Körperbewegung, die Entfernung zum Körper, die benötigte persönliche Schutzausrüstung sowie die psychische Belastung der Beschäftigten,

2. die Beschäftigten müssen über einen ausreichenden Bewegungsfreiraum verfügen,

Figs. 1-4 Pneumatic lift table: Do you want to effortlessly lift or lower heavy packaging items and get them into the right gripping or working height? If so, the pneumatic lift table is just what you need, and it's also the ideal solution as an interface to the flow of materials.

Fig. 5 Inclined mounting profiles and sloping shelves support ergonomic movement at the packing station.

Fig. 6 Height adjustment with a folding crank - 710-960 mm: easily adjust the table to the right working height.

Fig. 7 Electrical height adjustment - 710-960 mm: featuring four saved settings and a height display, the table can be variably positioned to suit each employee.

Fig. 8 Workplace mats: These protect the joints and spinal discs, are slip-resistant, and offer sure footing at the workplace. The special structure of the underside of the workplace mats also means that the body stays in motion. This is good for the circulation, prevents fatigue, and reduces strain on one side of the body. Other versions are also available for entire aisles and are, as you would expect, suitable for use with pallet trucks.

The overhauled SYSTEM BASIC is the inexpensive entry-level system for the packing world. Limited to the main components, SYSTEM BASIC offers a budget table without having to sacrifice stability.

SYSTEM BASIC

SYSTEM BASIC

The solution for application areas where every euro counts. This packing table meets the same demanding quality expectations we ourselves place in our products.
It has a working height of 850 mm, which can naturally be adjusted as required.

• Sturdy steel table with integrated bearing shells
  for holding a material roll shaft
• 19 mm worktop
• 100 kg surface load capacity
• Melamine resin-coated worktop
• Galvanised steel shelves
• Cutter with titanium-coated blade
• IT accessories for PC, monitor and keyboard
• Powder-coated steel parts: gentian blue RAL 5010

NEW features:
• Add-on storage rack made of square tubing
• Lockable drawer made of sheet steel
• Undertable cardboard storage rack made of square tubing
• Galvanised steel side table
• Galvanised steel backboard
• BASIC cutter stand for paper, foam and air bubble film
• Spindle for roll material above or underneath the table

PRACTICABLE

Reduced to the basic essentials!
The SYSTEM BASIC offers all the main functions at an attractive price.
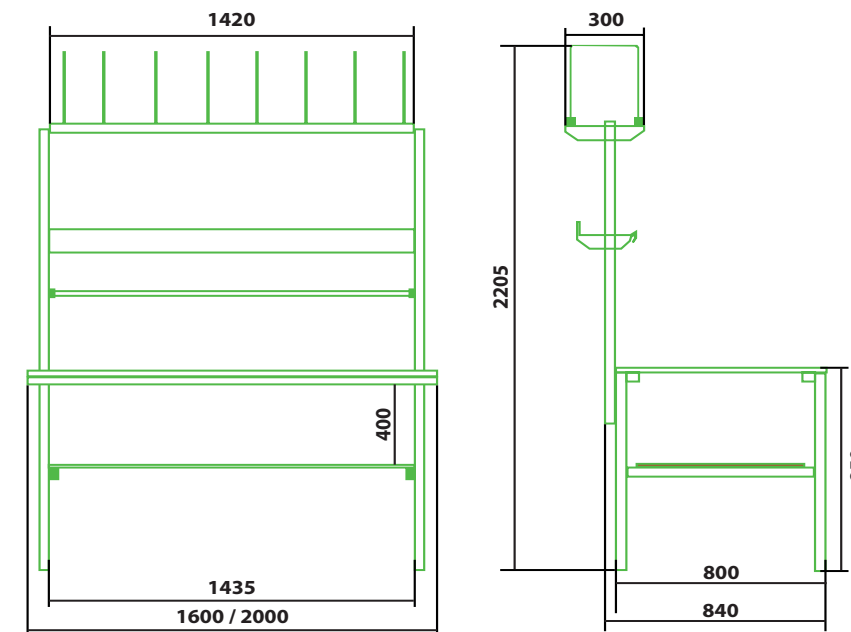

Our range of accessories offers numerous expand-ability options.
Extra shelving, IT accessories, drawers, containers, as well as mobile cupboard and drawer units. Detailed information can be found on the following pages.

Plan and design
SYSTEM BASIC

1.

SYSTEM BASIC packing and work table
- Sturdy steel construction
- Struts and legs made of square tubing
- Melamine resin-coated 19 mm table top
- Max. surface load 100 kg

Order no.	W x D x H (mm)	RRP
700001	1600 x 800 x 850	335,00 Euro
700002	2000 x 800 x 850	366,00 Euro

2.

Uprights
- For any combination of table accessories
- 1 set = 2 pcs.
- Height above table 1030 mm, slots every 200 mm

Order no.	W x D x H (mm)	RRP
700030	40 x 40 x 1266	74,00 Euro

3.

Bottom shelf
- Melamine resin-coated 19 mm sheet
- Max. surface load 50 kg
- Weight 19 kg

Order no.	W x D x H (mm)	RRP
700100	1525 x 650 x 19	161,00 Euro

4.

Add-on storage rack
- Square tubing
- Incl. 8 dividers
- Max. surface load 50 kg
- Weight 19 kg

Order no.	W x D x H (mm)	RRP
700050	1420 x 300 x 400	160,00 Euro

5.
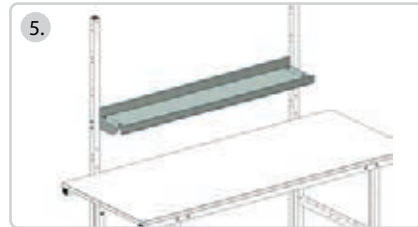

Document shelf
- Galvanised sheet steel for attachment to uprights
- Max. surface load 50 kg
- Weight 6 kg

Order no.	W x D x H (mm)	RRP
700060	1425 x 253 x 114	83,00 Euro

6.

Storage shelf
- Galvanised sheet steel for attachment to uprights
- Max. surface load 25 kg
- Weight 15 kg

Order no.	W x D x H (mm)	RRP
700070	1430 x 400 x 58	103,00 Euro

7.

Drawer
- Made of sheet steel
- Lockable
- Load capacity 12.5 kg

Order no.	W x D x H (mm)	RRP
700120	513 x 530 x 160	139,00 Euro

8.

Container
- Mobile with 4 castors
- 2 lockable castors
- Load capacity 50 kg
- Sturdy plastic
- Weight 7 kg

Order no.	W x D x H (mm)	RRP
700110	610 x 416 x 495	111,00 Euro

9.

Drawer unit
- Sheet steel
- Mobile with 4 castors
- 2 lockable castors
- Four drawers
- Load capacity 35 kg per drawer
- Weight 42 kg

Order no.	W x D x H (mm)	RRP
3010	490 x 600 x 675	543,00 Euro

10.

Cupboard unit
- Sheet steel
- Mobile with 4 castors
- 2 lockable castors
- With 1 drawer and 1 cupboard door
- Load capacity 50 kg
- Weight 32 kg

Order no.	W x D x H (mm)	RRP
3011	490 x 600 x 675	459,00 Euro

11.

Undertable cardboard storage rack
- Square tubing
- Mobile with 4 castors
- 2 lockable castors
- Incl. 8 dividers
- Surface load 50 kg
- Weight 14 kg

Order no.	W x D x H (mm)	RRP
700080	1415 x 300 x 415	170,00 Euro

12.

Side table
- Square tubing
- Sheet steel table top
- Galvanised
- Max. surface load 100 kg
- Weight 20 kg

Order no.	W x D x H (mm)	RRP
700020	600 x 600 x 750	152,00 Euro

13.

Add-on cutter
- For attachment to uprights
- Cutting width 1250 mm
- Incl. shaft
- Galvanised
- Weight 12 kg

Order no.	W x D x H (mm)	RRP
700090	1500 x 175 x 20	269,00 Euro

14.

Backboard
- For attachment to uprights
- Sheet steel
- Galvanised
- Weight 2 kg

Order no.	W x D x H (mm)	RRP
700040	1515 x 4 x 70	33,00 Euro

15.

PC holder with strap
- For securing the PC underneath the table
- Weight 1 kg

Order no.	W x D x H (mm)	RRP
308100	Umkreis max. 1680	52,00 Euro

16.
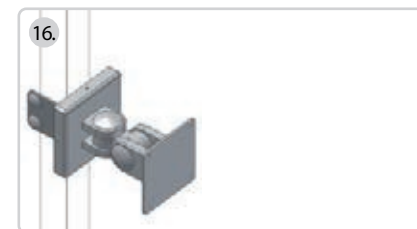

Screen holder, Vesa 75/100
- Incl. adapter for Vesa 75 and Vesa 100
- Weight 0.5 kg

Order no.	W x D x H (mm)	RRP
228120	200 x 100 x 100	118,00 Euro

17.

Cutter stand
- Horizontal
- With blades for foam, air bubble film, etc.
- Cutting width 1250 mm
- Max. roll weight 50 kg
- Max. roll diameter 1000 mm

Order no.	W x D x H (mm)	RRP
700130	1500 x 975 x 1100	309,00 Euro

18.

Spindle between the uprights
- For mounting material rolls max. Ø 300 mm
- Load capacity 20 kg

Order no.	W x D x H (mm)	RRP
700140	1425	19,00 Euro

19.

Spindle underneath the table (between feet)
- For mounting material rolls max. Ø 750 mm
- Load capacity 100 kg

Order no.	W x D x H (mm)	RRP
700150	1430	32,00 Euro

The different components of SYSTEM BASIC allow you to design an individual workplace.
Experience shows that many needs can be covered by our basic system. And the attractive price means that it will quickly pay for itself!

On page 90 you will find some interesting facts about the add-on cutter!

Document shelf

Steel drawer

SYSTEM 1600

Complete packing station with 1600 mm wide table top, document shelf and cardboard storage rack

• Sturdy steel table
• 30 mm worktop
• 300 kg surface load capacity
• Light grey worktop coated with melamine resin
• Steel components with powder-coated finish, anthracite RAL 7016, ruby red RAL 3003

Order no. 163001 – RRP 1.039,00 €
W x D x H (mm): 1600 x 800 x 690-960
With bottom shelf (1145 x 650 x 19 mm)
and steel drawer (520 x 500 x 150 mm)

Order no. 163002 – RRP 1.099,00 €
W x D x H (mm): 1600 x 800 x 690-960
Like 163001 but with cutter in silver-grey RAL 9007, cutter cartridges for paper and foils, cutting width 100 cm, spindle set with cones and bearing shells
(without drawer and bottom shelf)

Add-on cutter

Roll holder

SYSTEMATIC

SYSTEM 1600 offers you two all-in-one solutions with either a bottom shelf and steel drawer, or with a roll holder and add-on cutter - depending on what it is to be used for.

Do you need other accessories? That's no problem, as both all-in-one solutions can be extended with accessories from the SYSTEM range. You can also put together your own custom solution from the SYSTEM 1600 elements shown on the following pages. The SYSTEM 1600 has an adjustable height of between 690 mm and 960 mm as standard.

SYSTEM 2000

SYSTEM 2000

On the following pages we will show you several interesting solutions, regardless of whether you require a single, extremely efficient workplace, or you want to equip an entire logistics centre.

Here you will find further information about ergonomics and our extensive range of IT accessories. Key aspects of consignment processes are the flow of materials and weighing, which naturally also includes our roller track tables.

- Sturdy steel table
- 30 mm worktop
- 300 kg surface load capacity
- Max. load capacity of lifting system 350 kg
- Light grey worktop, coated with melamine resin
- Steel components with powder-coated finish, anthracite RAL 7016, ruby red RAL 3003
- Optional height adjustment with a crank or electric motor
- Custom solutions as special designs
- Extensive range of accessories
- Flexible clamp mounting for accessories
- Tables with integrated scale and/or roller track

SYSTEMATIC

Classics, bestsellers, standard - these are terms we hear time and time again in conjunction with our SYSTEM 2000. "Extremely versatile and long-lasting" - that probably sums it up. The SYSTEM 2000 offers a multitude of combination possibilities. Beginning with the various types of tables through to the extensive range of accessories and suitable cutter stands, the system offers the ideal solution for all your needs.

All measurements in mm

If the work surface is too large, over time all kinds of things accumulate on it which don't belong there. Keep your workplace completely clear and orderly right from the outset with the appropriate accessories. This will save time and calm your nerves!

SYSTEM 2000

Special features at a glance:

- SYSTEM 2000 can be expanded or upgraded whenever the need arises. This means that your products keep flowing when processes and demands change. At the same time you get a high degree of investment security.

- Daisy-chaining, integration and adaptation options offer countless possibilities from single workplaces up to complete packaging lines.

- SYSTEM 2000 organises everything you need ergonomically and close at hand, creating a tidy and efficient workplace.

- SYSTEM 2000 is versatile, and can be supplied as a packing table, roller track table, with an integrated scale, as well as with various height adjustments.

- Custom solutions. Together with your local specialist trading partner, we can develop a custom solution with SYSTEM 2000 to meet your needs.
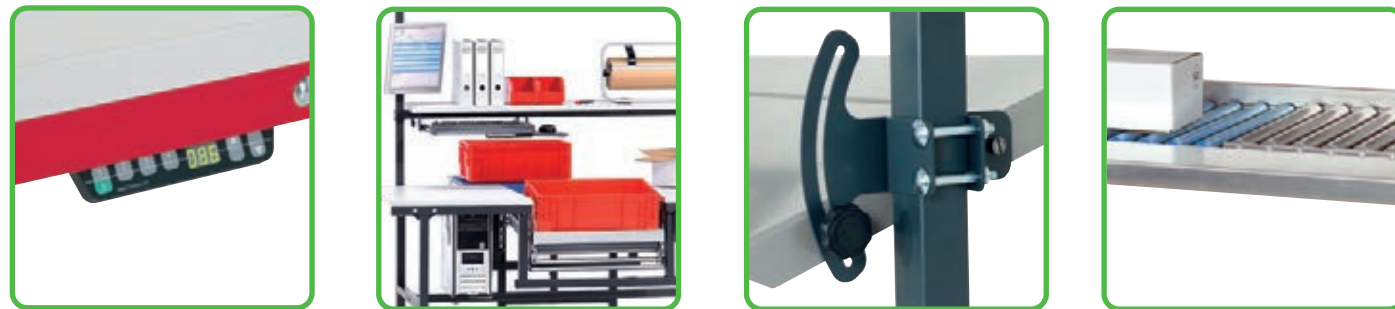

Alongside high quality standards, being located in Germany also means that we can guarantee short delivery times and efficiently supply accessories and spare parts.

Surfaces

It goes without saying that we can offer you the right worktop for every application. As well as mechanical strain and which transport containers are used, "soft" factors also play a role. We can fulfil your colour requirements as well as provide different woodgrain decors for a pleasant working atmosphere. For assembly work, for instance, we recommend a finger-jointed worktop. A brand new addition to the range is our cut-resistant surface, e.g. for cutting packing material to size at the workplace. Our melamine resin coating has proven to be a real all-rounder, which we supply as standard.

Melamine resin coating:
For assembly and packing work

Conductive (ESD protection):
For assembling and packing electronic components

Plywood boards / multiplex:
For extreme mechanical strain and loads

Stainless steel:
For workplaces where people work with oil, acids or other fluids

You can protect the table top with a cut-resistant surface!
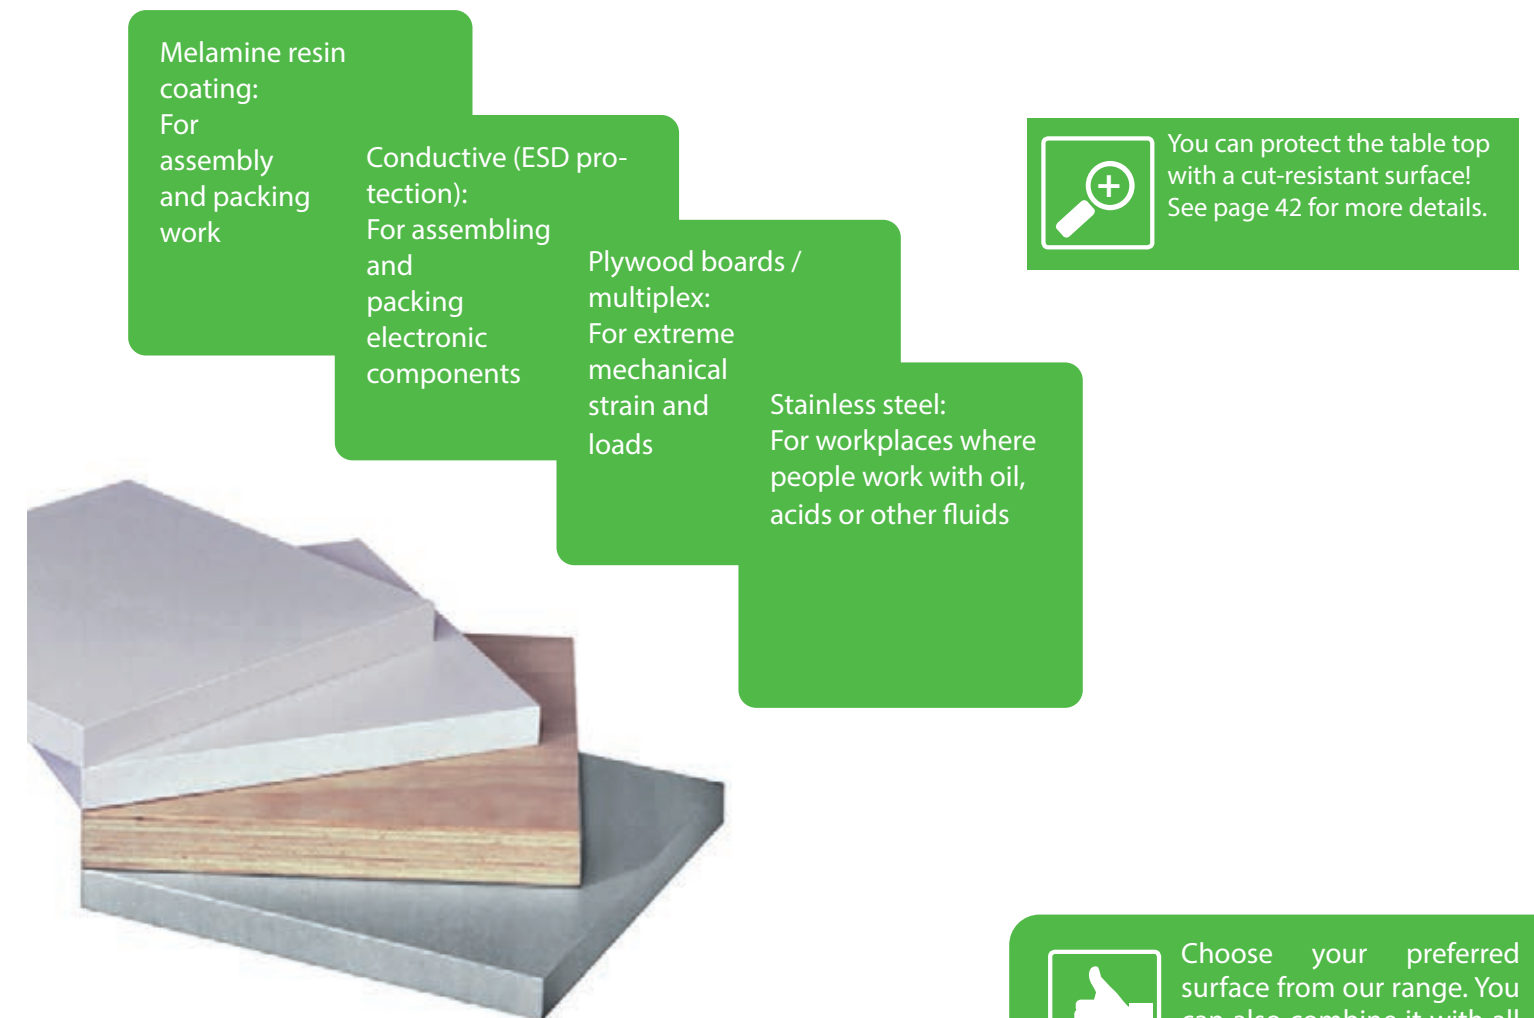

Choose your preferred surface from our range. You can also combine it with all the other packing table systems!
Not only that, but you can even choose your favourite accentuating colour! Discuss your requirements with our trained sales partners – we'll be glad to help you!

Ergonomically integrated IT

• Holders for PCs, thin clients and notebooks
• Flexible monitor holders for different designs
• Ergonomic solutions for keyboard and mouse
• Printer platforms and trolleys for different printing systems
• Easy assembly
• Easy access for servicing
• Ongoing developments and adaptations to
  accommodate new technologies
• Other solutions available on request

Fig. A
The various screen folding arms, as well as the keyboard and mouse platform with folding arm, can be individually combined with the supporting column, upright adapters or profile rails. The fastening system allows monitors to be easily installed (they can be secured with fixing screws).

Fig. B
Retracting printer shelf for label printers: Allows you to easily replace the printing media. Simply pull the shelf with the printer towards you for convenient access to the labels (rolls) and printing foil.

Fig. C
Printer trolley: Sturdy and mobile steel design, ideal for larger laser printers with tray, e.g. for paper.

SYSTEM 2000

Maximum flexibility
The roller track table for SYSTEM 2000
• With work surface as a packing table
• Without work surface as a transport/buffer table
• Optionally available with integrated scale

With the right scale, you can do more than just weigh things!

With a scale, the first thing that springs to mind is weighing something. However, depending on the type of scale, it can do much more than just that. Counting scales, for example, can be helpful for order-picking small items or be used as "counting aids" in the incoming goods department. Linked to the ERP system or an article database recorded in the scale, weight plausibility checks can also be conducted during order picking. Supplemented by a barcode scanner and label printer, a large number of other solutions can also be realised. A suitable scale is available for every application purpose. Your specialist dealer will also consider this aspect during a personal consultation.

Uninterrupted flow of materials

The flexibility of SYSTEM 2000 enables you to integrate it in your order picking and packaging processes. Various interface solutions, together with adaptation and integration options, assure an uninterrupted flow of products. One example of this are the weighing systems integrated in the table or roller track, as well as the ball units. The modular design means that adaptations can be made in the future with little effort and at a low cost. After all, it's not just the products that flow, but the processes as well.

The scale can optionally also be positioned on the left or in the middle

Don't forget to take the upstream and downstream processes into account in your planning. How does the product get to the workplace, what's the next step? What happens with the empty transport containers, for instance?

SELECT QUALITY
REDUCE ⟳ RE-USE ⟳ RECYCLE

SYSTEM 2000

Flexible and versatile

Our roller track head table is especially interesting. On this table, the roller track element is rotated by 90 degrees, and both the height and the angle can be adjusted.

This allows for both ergonomic positioning of the order picking container or packaging, as well as flexible integration in the product flow.

Our roller track tables are available in numerous combinations and designs:

- with and without work surface
- with integrated scale
- optional height adjustment with a crank
- roller track element parallel to the work surface or rotated by 90°
- adjustable angle on pure roller track tables
- suitable as a transport or buffer line
- custom solutions with rollers, small rollers or ball elements
- compatible with the accessories for SYSTEM 2000 work tables

We are constantly active, just like your processes! Safeguard your future with flexible, extendable and adaptable systems!

Roller track tables

Roller track tables are the adaptive interface to the conveyor system and provide for smooth integration in the product flow. We can offer you different variations with and without a work surface, as well as with an integrated scale or height adjustment.

- Max. load capacity of lifting system 30 kg

Order no.	W x D x H (mm)	RRP
209040	700 x 800 x 700 - 920	855,00 Euro

10. NEW

Mobile electric lift table
- height adjustment via electric motor
- with three working height memory positions
- mobile with 4 swivel castors
- incl. battery pack
- max. load capacity 60 kg
- max. load capacity of lifting system 80 kg
- speed of lifting system 38 mm/sec.

Order no.	W x D x H (mm)	RRP
209050	700 x 800 x 554-854	1.340,00 Euro

11. NEW

Stationary electric lift table
- height adjustment via electric motor
- with three working height memory positions
- max. load capacity 60 kg
- max. load capacity of lifting system 80 kg
- speed of lifting system 38 mm/sec.

Order no.	W x D x H (mm)	RRP
209051	700 x 800 x 540-840	980,00 Euro

12.

Pneumatic lift table
- Allows effortless lifting and lowering of heavy cartons
- Requires 6 bar compressed air supply
- 250 mm lift height
- Max. load capacity 60 kg
- Weight 50 kg
- Speed of lifting system 160 mm/sec.

Order no.	W x D x H (mm)	RRP
209100	600 x 600 x 500-710	2.355,00 Euro

13.

Pneumatic lift table, stainless steel platform
- Stainless steel platform WxD 450 x 600 mm
- Lift 500 mm
- Incl. foot switch
- Table prepared for bolting to floor
- Mounting materials not included
- Requires 6 bar compressed air supply
- Max. load capacity 60 kg
- Speed of lifting system 160 mm/sec.

Order no.	WxDxH(mm)	RRP
209101 Lift height 200-700 mm	450 x 735 x 1275	3.215,00 Euro
209102 Lift height 200-900 mm	450 x 735 x 1675	3.484,00 Euro

14.

Pneumatic lift table, stainless steel platform
- Stainless steel platform WxD 450x600 mm
- Lift 500 mm resp. 700 mm
- Incl. foot switch
- Table with pedestal base
- Requires 6 bar compressed air supply
- Max. load capacity 60 kg
- Speed of lifting system 160 mm/sec.

Order no.	WxDxH(mm)	RRP
209103 Lift height 250 - 750 mm	450 x 845 x 1320	3.217,00 Euro
209104 Lift height 250 - 950 mm	450 x 840 x 1720	3.485,00 Euro

Other accessories
SYSTEM 1600, SYSTEM 2000
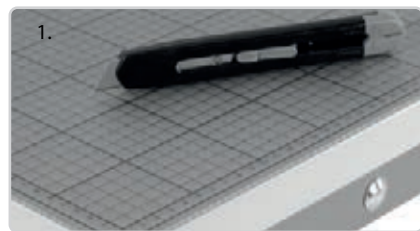

1.

Cut-resistant overlay
- Transparent
- For traceless cuts
- Surface with slight anti-slip effect

Order no.	W x D x H (mm)	RRP
509400	900 x 600 x 3 Weight 2 kg	61,00 Euro

2.

Cut-resistant overlay
- Protects parts of the worktop against damage from mechanical strain
- Bonded to table top with the supplied adhesive pads

Order no.	W x D x H (mm)	RRP
203095 Stainless steel	1000 x 800 x 1 Weight 13 kg	169,00 Euro
203096 Galvanised sheet steel	1000 x 800 x 2 Weight 12 kg	104,00 Euro

3.

Reservoir made of PP cavity sheeting
- Mould and moisture-proof
- For hygienic applications, no fibre formation on the surface
- Shock-absorbing
- Set = 2 pcs.

Order no.	W x D x H (mm)	RRP
2056	600 x 500 x 600	82,00 Euro

4.

Slice - Auto-Retractable Box Cutter
- Incl. one double-sided ceramic blade
- Automatically retractable blade
- 8-10 times sharper than a steel blade
- Easy blade change
- Injury-proof handling

Order no.	W x D x H (mm)	RRP
99090238		29,00 Euro

5.

Solo Lift Pro carry aid
- Practical, single-handed lifting aid for small, light boxes

Order no.	W x D x H (mm)	RRP
99090233		19,00 Euro

6.

Dual Lift Pro carry aid
- With 2 belt pouches
- Safe lifting of large and heavy cartons through effective load distribution

Order no.	W x D x H (mm)	RRP
99090234		24,00 Euro

7.

Display panel holder with magnetic attachment
- Display panel holder with 5 display panels, black
- Metal wall holder with magnetic back

Order no.	W x D x H (mm)	RRP
591401		55,00 Euro

8.

Display panel holder as table stand-up display
- Complete set made of powder-coated steel for table top use
- L-shaped, metal table stand-up display with 10 display panels, assorted colours

Order no.	W x D x H (mm)	RRP
557000		82,00 Euro

9.

A4 display panel
- 5 display panels
- Polypropylene display panels with black all-round profile frame
- For DIN A4 info sheets

Order no.	W x D x H (mm)	RRP
560601		25,00 Euro

10.

Mobile hanging frame
- 360° swivel mounting

Order no.	W x D x H (mm)	RRP
2046	1050 x 700 x 2100-3500 Weight 50 kg	580,00 Euro
802045 Extension strut with bracket	Weight 2 kg	191,00 Euro

11.

Mobile cardboard storage rack
- Two levels
- With handle

Order no.	W x D x H (mm)	RRP
2042-2 Cardboard storage rack, short For approx. 200 folding cartons	1015 x 600 x 1260 Weight 42 kg	583,00 Euro
2043-2 Cardboard storage rack, long, For approx. 320 folding cartons	1600 x 600 x 1260 Weight 58 kg	629,00 Euro

12.

Mobile cardboard storage rack
- Three levels
- With handle

Order no.	W x D x H (mm)	RRP
2042-3 Cardboard storage rack, short For approx. 300 folding cartons	1015 x 600 x 1860 Weight 64 kg	768,00 Euro
2043-3 Cardboard storage rack, long, For approx. 480 folding cartons	1600 x 600 x 1860 Weight 88 kg	831,00 Euro

13.

Rubbish bin
- holding capacity 90l
- with handles for easy transportation

Order no.	W x D x H (mm)	RRP
99090241	520 x 490 x 610	55,00 Euro

14.

Trolley for 90 litre rubbish bin
- carriage white varnished metal
- four swivel castors
- total height when using rubbish bin: 740 mm

Order no.	W x D x H (mm)	RRP
99090240	395 x 385 x 180	78,00 Euro

Add-on storage rack can be mounted level or inclined

HR mounting profile
For inclined mounting at 0° or 20°

Shelf can be hooked on at +20°, 0°, -20°

Thin client holder

Horizontally adjustable HR mounting profile

SELECT QUALITY
REDUCE ⟐ RE-USE ⟐ RECYCLE

The HR mounting profiles are the real star of SYSTEM FLEX. Lateral grooves are used for the infinitely variable attachment of components such as perforated back panels, monitor swivel arms and other accessories. The front sides have a grid perforation of 39:39 mm for quickly hanging on shelves, retracting platforms, roll holders and other components without screws.

SYSTEM FLEX

Special features at a glance:

- The HR profile tube combines the advantages of an aluminium profile and a sturdy steel construction to create a totally innovative and exceedingly flexible concept.

- The front sides of the HR mounting profiles have a grid perforation of 39:39 mm for quickly hanging on shelves, roll holders and other components without screws. This means that you can easily adapt the table to suit your processes, even when they change.

- The lateral grooves are used to attach components such as perforated back panels, monitor swivel arms and other accessories and flexibly adjust their height. New accessories can be easily added as required.

- The top section of the HR mounting profile can be mounted upright or inclined by 20 degrees. This significantly improves the grip position of the add-on parts! The grip area becomes more ergonomic for the workers. The carrier arms can also be mounted at an angle of -20°, 0° and +20°. This results in numerous combination possibilities.

- By detaching the mounting profiles from the table leg, the structures can also be infinitely moved horizontally on the frame to accommodate conveyor system connections, for instance.

- The first packing table that has been certified by the German interest group of back-training teachers as an ergonomic product.

- Daisy-chaining, integration and adaptation options offer countless possibilities from single workplaces up to complete packaging lines.

Combine the possibilities

Ergonomics play a key role, but not at the expense of flexibility. The top section of the mounting profile can be mounted upright or inclined by 20 degrees. This significantly improves the grip position of the shelves and accessories. By detaching the mounting profiles from the table leg, the structures can additionally be moved horizontally to any position to accommodate conveyor system connections, for instance.
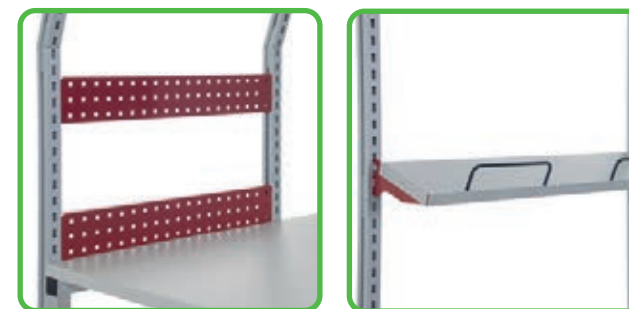

"Switching to the FLEX table system has resulted in a time optimisation of 20% per order in our delivery department. At the same time, our employees are motivated and relaxed when they finish work. We hadn't reckoned with that."
Jan H., logistics manager

All electrically height-adjustable SYSTEM FLEX tables are equipped as standard with our control panel with fourfold memory storage

Basic table set
SYSTEM FLEX Light

SYSTEM FLEX Light allows you to use the advantages of a high-end pro-version at the price of an entry-level system. Our new "light version" with standard electrical height adjustment succeeds in balancing high-performance and cost-effective and therefore sets new standards for packing tables. Modular SYSTEM FLEX accessories such as shelves, holders and other ergonomically adjustable add-ons can be mounted above the table where they guarantee flexible functionality and expand your efficiency expertly.

SYSTEM FLEX Light basic table set
The SYSTEM FLEX Light basic table with standard electrical height-adjustment includes three HR mounting profiles, onto which the extensive FLEX range of accessories (system width 800 mm) above the table can be attached. Furthermore, two perforated back panels are included which function as crush protection and can also be used to store e.g. the hook range. Max. load capacity of lifting system 120 kg, speed of lifting system 31 mm/sec.

Lifting protection
- SYSTEM FLEX, functions as protection against the carrier arms being lifted or levered up
- 1 sales unit: 10 pieces
- red plastic

Order no.	W x D x H (mm)	RRP
73314000		4,00 Euro

Please note for two-sided shelving:
For trays which are at right angles to the spar, please order two tray types A, otherwise type A and type B must be combined as shown.

SYSTEM FLEX scales and weighing accessories

Digital table scale 60 kg
- Evaluation unit made of ABS plastic
- 2 m measuring cable with plug connector
- 230 V mains connection via external power adapter, 1.8 m cable
- Powder-coated, stainless steel weighing platform, W x D: 500x400 mm, for max. weight 60 kg, 20 g scale divisions, 1 strain gauge load cell made of anodised aluminium alloy, IP 66

Order no.	W x D x H (mm)	RRP
897052	500 x 400 x 82 Weighing area	859,00 Euro

Digital table scale, 60 kg, with calibration function, PC connection
- Stainless steel evaluation unit, protection class IP 67, 25 mm LCD display for gross, net or tare weight, tare correction, 10 customisable printouts, 1 RS232 serial port
- Powder-coated, stainless steel weighing platform, WxD: 500x400 mm, for max. weight 60 kg, 20 g scale divisions, 1 strain gauge load cell of anodised aluminium alloy, IP 66

Order no.	W x D x H (mm)	RRP
897062	500 x 400 x 82 Weighing area	1.238,00 Euro

Holder for scale display unit
- For flexible attachment of a scale display unit to the mounting profile with the supplied adapter
- Data cable must have a min. length of 2000 mm.
- Load capacity 15 kg

Order no.	W x D x H (mm)	RRP
73310700	117 x 325 x 135	248,00 Euro

Further weighing accessories are also available on page 39 in the catalog.

ProtecTable

ProtecTable is our SYSTEM FLEX add-on for integrating an automatic air cushion machine into your logistics workplace.
The electric lift elevates the machine to its work position next to the storage silo and lowers it back to work table height for easy roll material changes. The storage silo is equipped with a storage net and mounting brackets ready for mounting to SYSTEM FLEX shelves, and collects the finished air cushions. The air cushions are stored in the silo for easy access through an opening in the net, allowing for direct processing at the workplace. The lift is operated via a hand switch and the cables are organised and protected at the side of the table by an energy chain. In combination with your air cushion machine, this system makes for simple and safe packaging processes. The optionally available installation panel with a 4-socket outlet can be installed between the packing table's Rocholz mounting profiles and can also hold the air cushion machine's control unit, if desired.

- efficient and ergonomic air cushion machine integration with storage silo
- max. load capacity: 30 kg, suitable for all standard air cushion machines
- lift-adjusting range approx. 1025 - 2325mm (1300mm stroke)
- dimensions platform WxDxH: 330 x 402 x 221mm
- dimensions net and brackets for silo WxDxH: 758 x 671 x 759mm

(mountable to 800mm wide shelves with a total depth of 600mm)

① SYSTEM FLEX ProtecTable Air– lift
- electric lift for air cushion machine
- max. load capacity while using the platform (73316402): 30 kg
- adjusting range approx. 1025 - 2325 mm (1300mm stroke)
- incl. control unit and 220V power supply cable 2.3 m

Order no.	W x D x H (mm)	RRP
73316401		1.135,00 Euro

② SYSTEM FLEX ProtecTable Air – platform
- platform for air cushion machine incl. energy chain
- platform (WxDxH: 330 x 402 x 221mm) for e.g. air cushion machine
- incl. energy chain for guiding the cables and assembly set for lift and platform

Order no.	W x D x H (mm)	RRP
73316402	330 x 402 x 221	278,00 Euro

③ SYSTEM FLEX ProtecTable Air – silo
- storage net with mounting brackets for e.g. air cushions
- for assembly 800 mm wide SYSTEM FLEX shelves need to be in place and have a total depth of 600mm
- net colour: grey
- size WxDxH: 758 x 671 x 759mm

Order no.	W x D x H (mm)	RRP
73316201	758 x 671 x 759	360,00 Euro

DocumenTable

DocumenTable enables you to take photos for documentation right at your logistics table in your dispatch or incoming goods department. The first step is to scan the delivery note number with the integrated scanner; this activates the system. As soon as the packet (or one layer in the packet) is readily packed, you can trigger the camera by operating the foot-activated switch. The images are automatically named with the delivery note number and a date and time stamp (exact to the second); this assigns them clearly and uniquely. The generated data is saved to the integrated storage (standard: 25 GB) and can be retrieved over the corresponding network. An integrated and clearly visible LED strip shows the system status at any given time. Other distinct indicators for scanning, such as order number, packet number or customer number, can also be used as identifiers for images. The corresponding shelf for SYSTEM FLEX is fully equipped, readily installed and merely needs to be connected to your power supply and IT-network. Depending on the application situation, the system can be operated over a manual button or a (wireless) scanner instead of over the foot-switch.

- Entire documentation of images without broad IT-knowledge
- Distinct classification of stored data
- Transmission via LAN into your own server structure, connection to your own ERP system possible
- All-on-one solution without follow-up costs

Retractable keyboard tray
- extendable mouse tray left or right
- minimum table top thickness 25 mm
- RAL 9006 white aluminium

Order no.	W x D x H (mm)	RRP
509318	300 x 565 x 100	216,00 Euro

10.

Add-on cutter
- cutting width 750 mm
- for hooking on to HR mounting profile

Order no.	W x D x H (mm)	RRP
73303900	1000 x 50 x 150	335,00 Euro

11.

Roll holder
- for screw attachment to HR mounting profile
- max. roll weight 25 kg
- max. roll width 750 mm
- max. roll diameter 800 mm

Order no.	W x D x H (mm)	RRP
73304000	1000 x 450	107,00 Euro

12.

Spindle set
- comprising of: 1 pair of cones, 4 clamp rings, 1 spindle, 2 cups
- spindle tube diameter 32 mm
- max. roll weight 100 kg

Order no.	W x D x H (mm)	RRP
73313100 for table width 1200		79,00 Euro
73313200 for table width 1600		85,00 Euro
73313300 for table width 2000		90,00 Euro

13.

Bottle holder
- for one small bottle and one 1.5l bottle
- for flexible attachment in the system groove of the HR mounting profile

Order no.	W x D x H (mm)	RRP
73308500	210 x 125 x 130	42,00 Euro

SYSTEM FLEX IT accessories

Thin client holder
- For screwing into the system grooves in the HR mounting profile
- Infinitely variable height adjustment

Order no.	W x D x H (mm)	RRP
73308300	300 x 70-120	43,00 Euro

Mini PC holder
- For mounting underneath the table, adjustable:
  interior height 205-360 mm,
  interior width 50-100 mm
- Incl. fastening screws and drilling template

PC holder
- For mounting underneath the table, adjustable:
  interior height 307-531 mm,
  interior width 78-220 mm
- Incl. fastening screws and drilling template
- Weight 3 kg

Order no.	W x D x H (mm)	RRP
228100	100-242 x 150 x 320-545	105,00
73316700 Adapter for PC holder	RAL9006, for mounting on the feet of the SYSTEM FLEX tables electrically	73,00 Euro

Screen folding arms
- For flexible attachment of a screen
- VESA 75/100 quick-release attachment

Order no.	W x D x H (mm)	RRP
509203 Load capacity 5 kg	100 x 455 x 115	180,00 Euro
509204 Load capacity 15 kg	100 x 455 x 200	206,00 Euro
509207 Load capacity 8 kg	100 x 455 x 200 branch (456-704mm)	214,00 Euro
509209 Load capacity 10 kg	100 x 700 x 200 branch (700 mm)	241,00 Euro
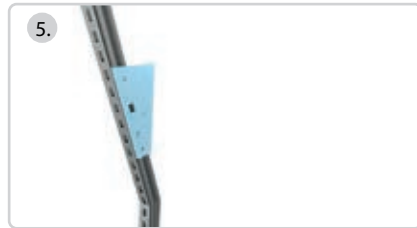

Adapter for Screen folding arms 509204 and 509203
- For attaching screen folding arms to inclined HR mounting profiles
- For positioning as required in the system grooves

Order no.	W x D x H (mm)	RRP
73313600		21,00 Euro

NEW

Tablet holder
- for attaching to screen folding arms
- for tablets from 7" to 10"
- clamping length 160 - 300 mm

Order no.	W x D x H (mm)	RRP
509214		65,00 Euro

Thin client holder for screen folding arm
- for attachment between TFT folding arm and monitor
- suitable for Vesa 100 x 100 mm

| Order no.	W x D x H (mm)	RRP
99090240	395 x 385 x 180	78,00 Euro

AssisTable

AssisTable is a digital work catalogue that assists users in picking and packing processes. Work steps are impacted by different factors; therefore, there are certain specifications as to how the item should be packed or processed and which documents should be added, depending on the supplier, destination country and/or certain item properties. The individual steps are shown in short form and with images. At the same time an integrated quality report records the factually performed activities and quantities. In this way, data is generated that can be used, for instance, for a billing model or for forward-looking capacity planning. The user-friendly interface ensures that the system can be used and work catalogues can be generated or updated after a short period of familiarisation and without broad IT-knowledge. Depending on requirements and intended purpose, the system can naturally be adapted individually.

- Economical added-value service
- Self-determined work in spite of product individualisation and large variety
- Server-based system that can be operated location-independently
- Automatic generation of economic indicators via digitalisation

InspecTable

InspecTable allows you to identify deviations and errors at an early stage – before the goods arrive with the customer. The image-based system compares the given situation with the pre-fed target situation and can analyse individual articles and their layers or positions as well as the entire picture. Machine Learning not only enables distinguishing between correct and false, but, depending on the intended application, also viewing percentage detection data and feeding individual groups into the system. The system is characterised by the ability to adapt flexibly to different working conditions and requirements; furthermore, there is no need for broad IT-knowledge as the set-up is so simple.

- Zero-fault-production due to optical monitoring
- Flexible system that only needs to be pre-trained once for a particular application
- Self-learning system that develops continuously with each task
- Optional maintenance service
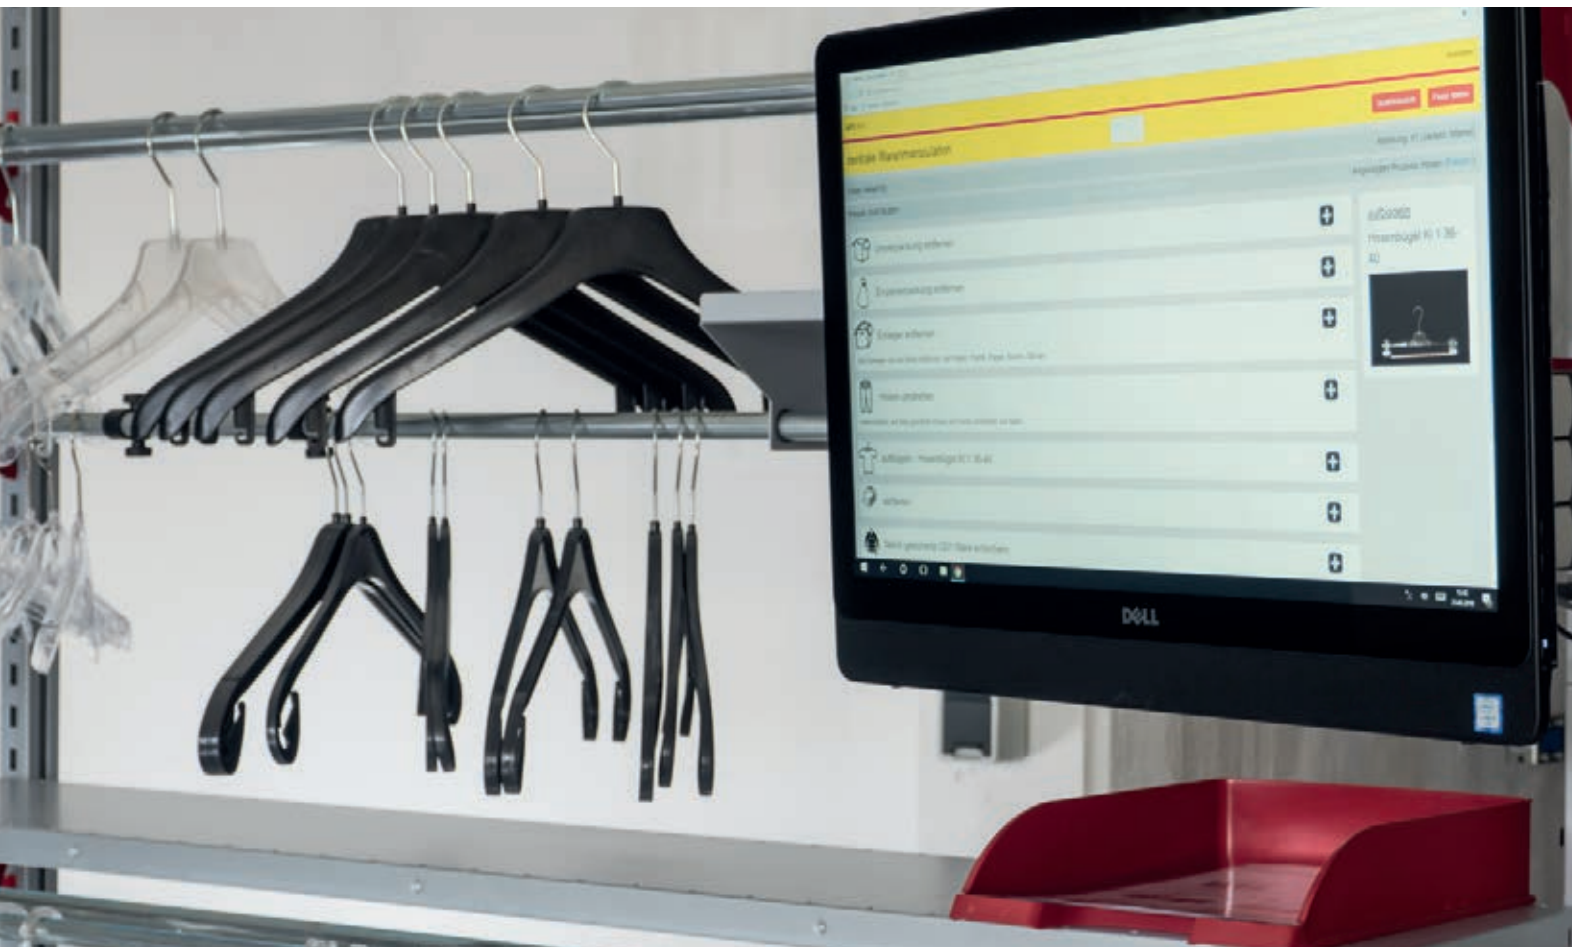

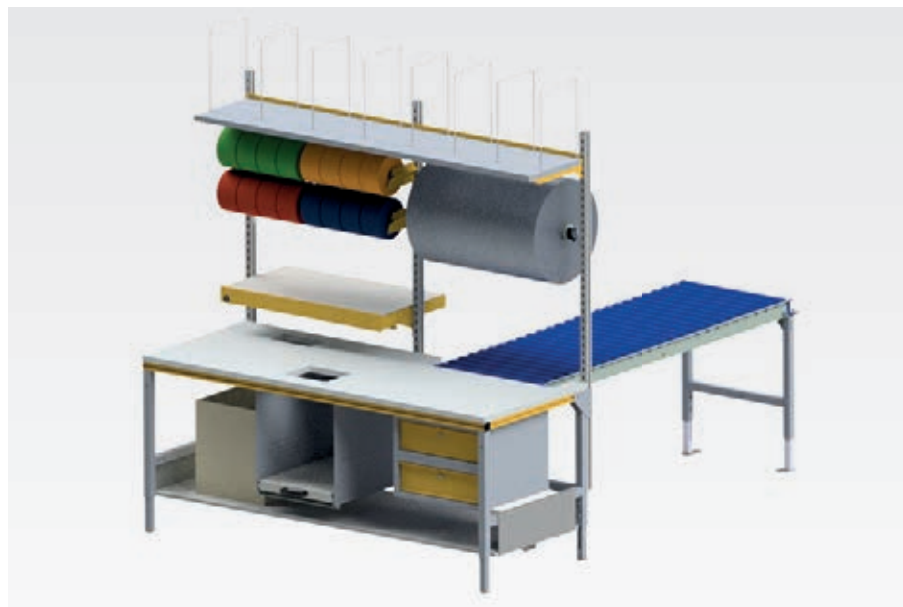

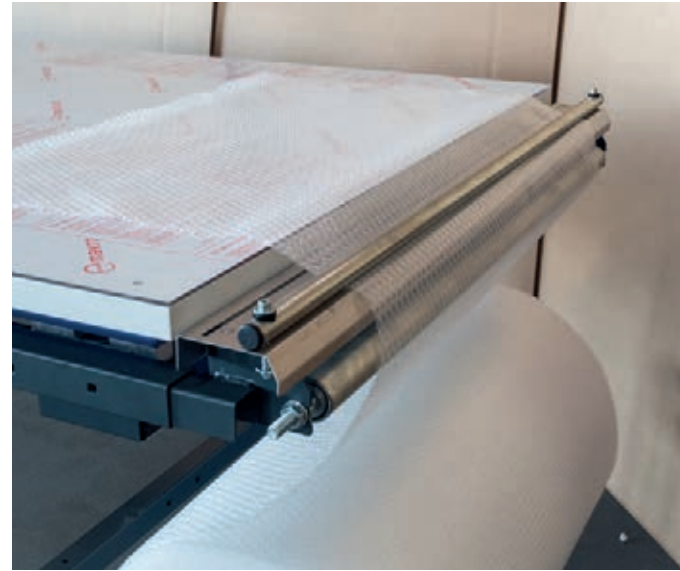

Individual solutions

Your Idea is Our Mission

The workplace plays a crucial but often underestimated role when it comes to productivity and optimising processes.
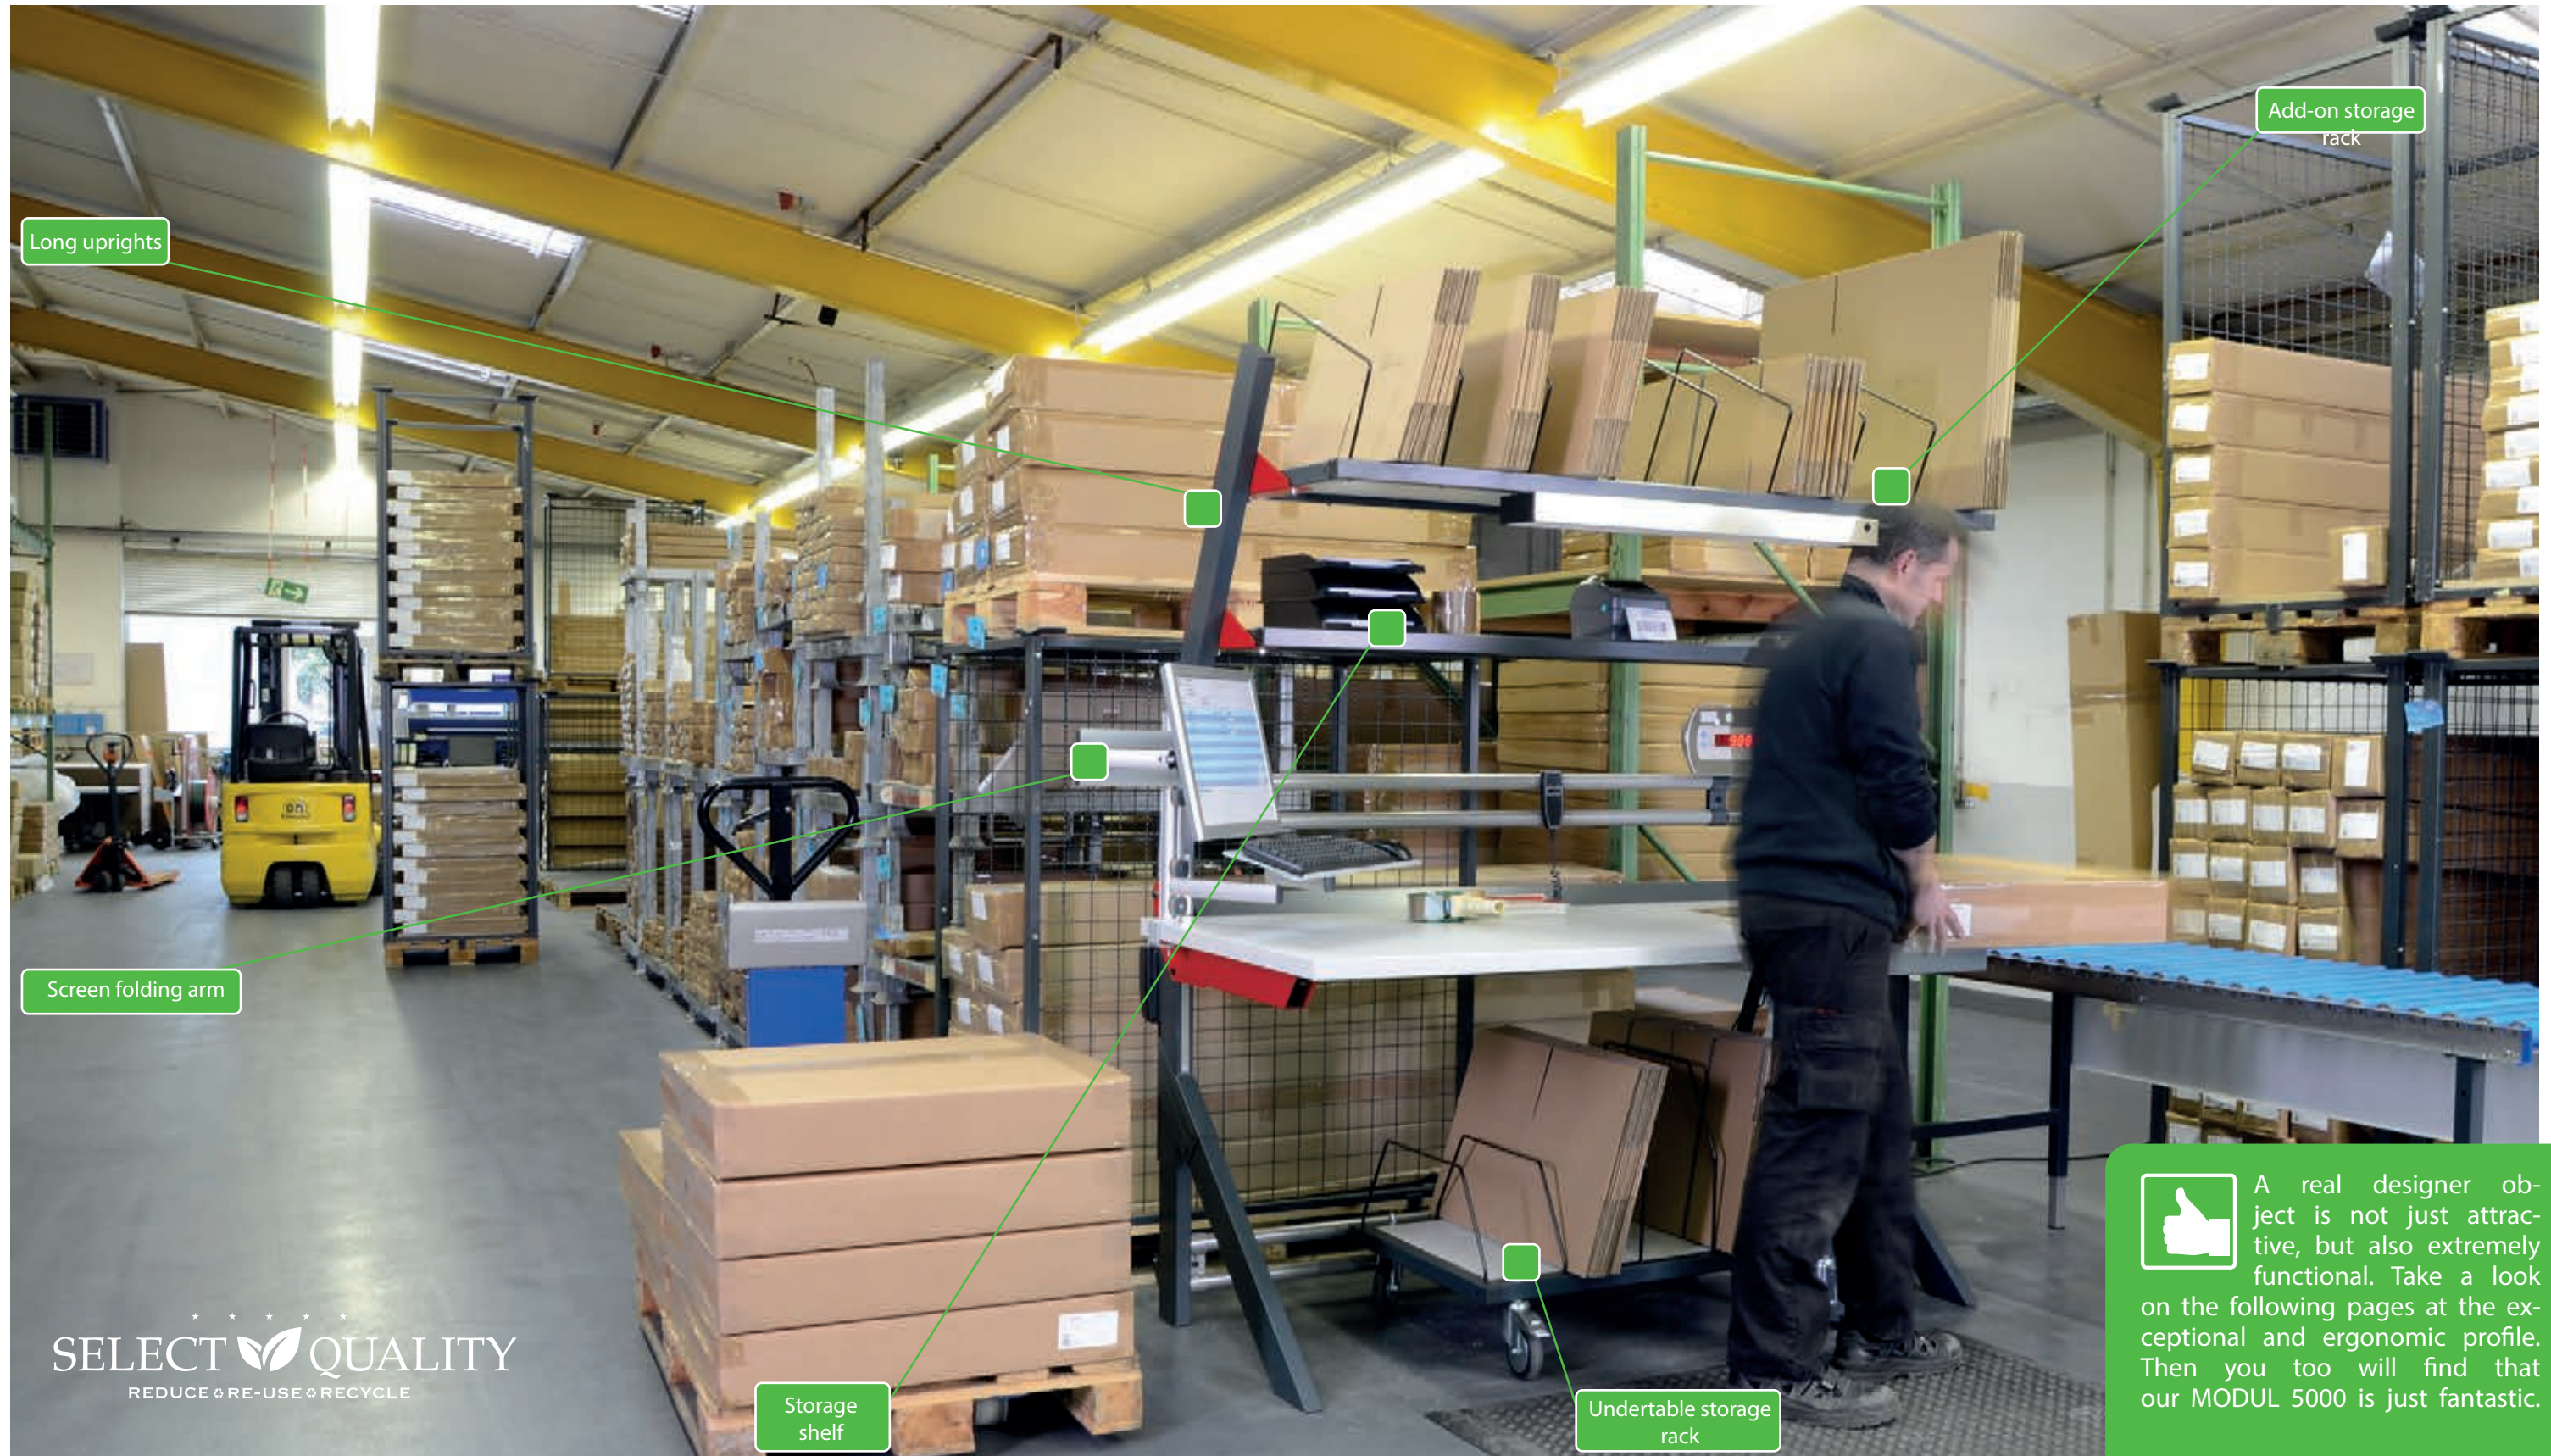

By effectively integrating workplaces into the flow of goods or considering downstream and upstream processes, it is possible to lower processing times and increase order picking and packing output by around 20%!

Together with the support of your local distributor, our dedicated department boasting years of extensive project experience aims to ensure that your packing workplaces are not only ideally integrated into product flow, but also satisfy and fulfil ergonomic standards.

You have a project that requires an individual solution?
Don't hesitate to get in touch with us!

SELECT QUALITY
REDUCE ◆ RE-USE ◆ RECYCLE

A real designer object is not just attractive, but also extremely functional. Take a look on the following pages at the exceptional and ergonomic profile. Then you too will find that our MODUL 5000 is just fantastic.

MODUL 5000

MODUL 5000

The design is exceptional, ergonomic, and has received international awards. Its intelligent construction enables even the basic configuration of the MODUL 5000 to be easily adapted to accommodate personal requirements for working seated or standing up. If required, the working level can also be adjusted using a crank mechanism, or for maximum convenience with an electric motor.

- Sturdy steel table
- Worktop 2000 x 880 x 38 mm
- 200 kg surface load capacity
- Light grey worktop, coated with melamine resin
- Steel components with powder-coated finish, anthracite RAL 7016, ruby red RAL 3003
- Simple height adjustment at 50 mm intervals (720-1070) without tools
- Optional height adjustment with a crank or electric motor
- Extensive range of accessories
- Tables with an integrated scale and/or roller track
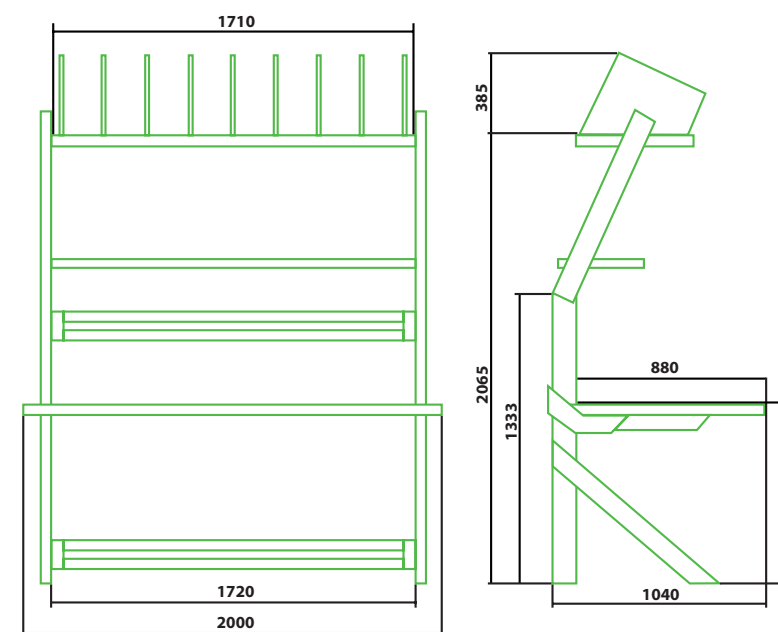

The MODUL 5000 is also ideal as an office workplace. Its "floating table top" means that there are no table legs to get in the way when you're sitting at it. The attractive design blends into every modern office landscape.

MODUL 5000

Ergonomics and design

The MODUL 5000 packing table with integrated roller track is a real highlight. The work surface made of galvanised sheet steel also offers enough space to "hold" even large cartons. The table height can be adjusted to between 770 and 1120 mm. This enables you to integrate it in your order picking and packaging processes.

• Ergonomic intersection for an uninterrupted flow of goods
• Integrated roller track
• Height adjustment at 50 mm intervals (720-1070)
• Optional height adjustment with a crank or electric motor
• Exceptional and ergonomic design
• Ergonomic positioning of the accessories
  by means of the inclined uprights

Maximalistic

The MODUL 5000 can also be equipped as a dual order picking and packing station.
The top level serves as a cardboard storage rack, while the picking products are readily available underneath it on a slanting shelf. The counting scale integrated in the packing table features a PC interface as well as printer and scanner ports.

The integrated pneumatic lift table moves packing items weighing up to 60 kg and allows for effortless order picking or packing. The products are conveniently transported to the conveyor system over the roller track table standing next to the station. This prevents muscle and back ailments, a frequent cause of incapacity for work.

The tables from the MODUL 5000 programme have an adjustable height of 720-1070 mm: manually at 50 mm increments, or infinitely with a crank or electric motor!

MODUL 5000

Special features at a glance:

- An exceptional and ergonomic design that has received international awards.

- Can be quickly and easily adapted to accommodate personal requirements for working seated or standing up. The working level can also be adjusted as required with a crank mechanism or electric motor.

- The modular system can be expanded and adapted for new requirements whenever necessary with elements from the extensive range of accessories.
This assures you long-term security for your investment.

- Also available in combination with an integrated scale and roller track.

- With MODUL 5000, we and our distribution partners can also offer you custom solutions for your own requirements.

527109 VESA 75/100 holder for screen	610 x 282	69,00 Euro

Cutting systems

For better cutting results

Choose from our proven and tested cutting systems with dispenser for roll material (such as paper, cardboard or foil) for use either as a stand-alone cutting station or right next to the packing workplace. The machinery quickly pays for itself since roll material is cheaper than cuttings. Not only that, but it also makes the dangerous and time-consuming handling of knives and scissors superfluous.

We supply
two cutter cartridges - as standard!

The cutter cartridges can be exchanged without any effort. The round cutter for paper, cardboard, etc., the blade for all soft foil. A clamping mechanism allows comfortable insertion of the material and safe holding after every cut.

Cutter stand, horizontal
Diameter of the axle tube for all articles 32 mm, core diameter 60 - 85 mm

Cutter stand, horizontal
- Dispensing height 890 mm
- Max. roll weight 200 kg
- Max. roll Ø 1000 mm

4.

Roll runners for devices 553...
- With 4 castors, 2 of which are lockable

Order no.	W x D x H (mm)	RRP Euro
5554 roll runners for devices 553... Load capacity per roll 75 kg	52 x 650 x 100 Weight 3 kg	124,00

5.

NEW

Swivel castors for cutter stand
- 1 sales unit = 4 pcs (2 of these lockable)
- plastic red/black
- roll diameter 75 mm

Order no.	W x D x H (mm)	RRP Euro
23601 Castors for devices 262..., 265..., 264... With 4 castors, 2 of which are lockable Load capacity per roll 70 kg	Weight 1 kg	52,00

Pneumatic cutter

The pneumatically powered cutter is used solely for cutting packing materials such as paper, tissue paper, kraft paper, corrugated cardboard, anti-rust paper, soft flat film, foam sheets, air bubble film, tubular film, etc.
Foam sheets can have a maximum thickness of 6 mm, air bubble film 10 mm.
Special and kraft paper with a grammage of more than 180 g/m^2 have to be tested for their cutting suitability. This also applies for flat and tubular film with a thickness of over 0.2 mm.

- Safe usage and ergonomic handling, especially for large cutting widths

- Consistent cutting quality

- Low fatigue, even for greater volumes, practicable for large widths (up to 1600 mm cutting width)

1.

Pneumatic cutter stand, horizontal
- Compressed air connection 6 bar (max.)
- Max. roll weight: 200 kg
- Max. roll Ø 750 mm

Order no.	Cutting width mm	W x D x H (mm)	RRP Euro
57310	1000	1730 x 970 x 1060	2.998,00
57312	1250	1980	3.208,00
57316	1600	2330	3.410,00

2.

Pneumatic add-on cutter
- For rear edge of table
- Max. clamping range 70 mm
- 57112 is only suitable for 203000

Order no.	Cutting width mm	W x D x H (mm)	RRP Euro
57112	1250	1980 x 235 x 200	2.879,00

The cutting speed is adjustable. Approx. 1.5 m/sec (factory setting)

Accessories for perforated back panels

1.

Tool holder with oblique hook
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder

2.

Tool holder with vertical hook end
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder

3.

**Tool holder with straight spike single**
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder

4.

Dual tool holder with oblique hook end
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder system

5.

Dual tool holder with vertical hook end
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder system

6.

Dual tool holder with straight spike
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder system

7.

Magnetic holder
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder system

8.

Machine tool holder
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder system

9.

Rounded holder
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder system

10.

Tool holder for self-service packaging
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder

11.

**Pipe bracket**
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder

12.

Cable holder with hookend 50mm
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder

13.

Storage box
- impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder

14.

Spanner holder
- For 8 spanners
- impact and scratch resistant coating
- „GS" safety tested tool holder system

15.

Screwdriver holder
- for 6 screwdrivers
- impact and scratch resistant coating
- „GS" safety tested tool holder system

16.

Drill/Allen key holder
- For 14 pieces various Ø
- impact and scratch resistant coating
- „GS" safety tested tool holder system

17.

Document tray
- Impact and scratch resistant
- coating stamped base plate 1,5mm
- „GS" safety tested tool holder system

18.

Tool holder set
- „GS" safety tested tool holder system

19. NEW

Open fronted storage boxes
- without holder
- 1 sales unit = 5 pcs

Order no.	W x D x H (mm)	RRP
704707	105 x 160 x 75	15,50 Euro

20. NEW

Adapter for open fronted storage boxes
- for attaching to a perforated back panel

Order no.	W x H (mm)	RRP
207010	550 x 58	48,00 Euro

The patent turn: the genuine ®RasterPlan screw made of polyamide protects the surface of the perforated back panel even after multiple changes in hanging position. ®RasterPlan tool holders can easily be hung into the perforations and fixed by a screw turn, providing a secure hold.

TRANSPORTING SYSTEMS

1.

Warehouse trolley with handlebar
- high-quality load area made of multiplex wood
- wheels: 2 swivel castors and 2 fixed castors
- TPE-tyres, 125 mm diameter, fitted on plastic rims

Order no.	load area	load capacity	RRP Euro
600300	850x500 mm	300 kg	151,00
600301	1000x600 mm	300 kg	174,00

2.

Platform trolley with handlebar
- high-quality load area made of multiplex wood
- wheels: 2 swivel castors and 2 fixed castors
- TPE-tyres, 125 mm diameter, fitted on plastic rims

Order no.	load area	load capacity	RRP Euro
600302	850x500 mm	500 kg	203,00
600303	1000x600 mm	600 kg	198,00
600304	1000x700 mm	600 kg	208,00
600305	1200x800 mm	600 kg	227,00

3.

Platform trolley with mesh front panel
- high-quality load area made of multiplex wood
- wheels: 2 swivel castors and 2 fixed castors
- TPE-tyres, 125 mm diameter, fitted on plastic rims

Order no.	load area	load capacity	RRP
600306	850×500 mm	500 kg	208,00
600307	1000×600 mm	600 kg	222,00
600308	1000×700 mm	600 kg	227,00
600309	1200×800 mm	600 kg	244,00

4.

Shelf trolley
- high-quality load area made of multiplex wood
- wheels: 2 swivel castors and 2 fixed castors
- TPE-tyres, 125 mm diameter, fitted on plastic rims
- 1460 mm height

Order no.	4 load areas	load capacity	RRP Euro
600310	850x500 mm	500 kg	355,00
600311	1000x600 mm	600 kg	404,00
600312	1000x700 mm	600 kg	434,00
600313	1200x800 mm	600 kg	504,00

5.

Shelf trolley with two galvanised mesh panels
- high-quality load area made of multiplex wood
- wheels: 2 swivel castors and 2 fixed castors
- TPE-tyres, 125 mm diameter, fitted on plastic rims
- 1500 mm height

Order no.	4 load areas	load capacity	RRP Euro
600314	850x500 mm	500 kg	430,00
600315	1000x600 mm	600 kg	499,00
600316	1000x700 mm	600 kg	534,00
600317	1200x800 mm	600 kg	604,00

6.

Parcel trolley
- high-quality load area made of multiplex wood
- wheels: 2 swivel castors and 2 fixed castors
- TPE-tyres, 125 mm diameter, fitted on plastic rims
- 1500 mm height

Order no.	load area	load capacity	RRP Euro
600318	850x500 mm	500 kg	482,00
600319	1000x600 mm	600 kg	528,00
600320	1000x700 mm	600 kg	551,00
600321	1200x800 mm	600 kg	587,00

All of our transporting devices are characterised by their functionality and longevity. They are perfectly suited to supplement your logistics workplace effectively. Handlebars in RAL 3003 (ruby red), 5010 (gentian blue) and 7016 (anthracite gray).

ESD accessories

ESD (electrostatic discharge) is a form of discharge that can occur due to different voltages in all kinds of daily situations. This kind of discharge can cause damage to electronic parts that is often not even recognisable. Therefore, we offer conductive worktops and ESD accessories for picking and packaging sensitive electronic components, which prevent damage by means of said conductivity.

1.
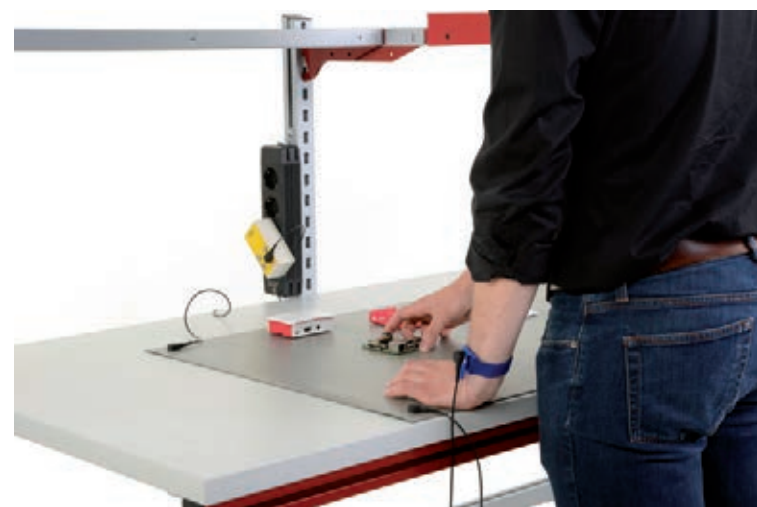

Ergonomic workplace mat
- ESD conductive in accordance, incl. connection cable
- surface: ball-shaped nubs
- colour: black
- incl. connection set comprising
  ESD grounding cable
  ESD drive-in nut
  ESD push button
  ESD screw M4X12
  ESD screw M4X20

Order no.	W x D x H (mm)	RRP Euro
99090215	1350 x 1000 x 16	335,00 Euro
86000101	1950 x 1000 x 16	552,00 Euro

2.

Wrist strap set
- wrist strap
- 10 mm snap + spiral cable
- length: 2m, 10 mm – 10 mm snap

| Order no.	W x D x H (mm)	RRP Euro
99090242	1000 x 600 x 5	52,00 Euro

3.

ESD workplace set
- mat for table with two snap connectors (10 mm, dimensions: 600 mm x 1000 mm; colour: grey)
- wrist strap, 3 mm snap
- spiral cable, length: 2m, 3 mm + 10 mm snap
- EBP box (shockproof grounding plug) with 2 x 10 snap + 1 x safety socket
- connection cable: mat for table – EBP box
- identification label

Order no.	W x D x H (mm)	RRP Euro
86000130	1000 x 600 x 10	215,00 Euro

**On request we gladly offer packing and workplaces SYSTEM 2000, SYSTEM FLEX, MODUL 5000 with ESD table tops.**
